1. Scope of Work

The selected Solutions Provider will be responsible for the following:

- **Network Architecture Design:** Develop a detailed HA network design with redundancy and failover mechanisms.
- **Hardware & Software Procurement:** Supply all necessary network components, including routers, switches, firewalls.
- **Implementation & Deployment:** Install, configure, and integrate the new network infrastructure with MFL's existing systems.
- **Testing & Validation:** Conduct performance tests to ensure system reliability and security.
- **Training & Documentation:** Provide hands-on training and detailed documentation for MFL's IT team.
- **Ongoing Support & Maintenance:** Offer 24/7 technical support, system audits, and troubleshooting services.

2. Expected Deliverables

The Solutions Provider is expected to deliver:

- A fully operational HA network architecture.
- Comprehensive project plan with milestones and timelines.
- Documentation, including network diagrams and operational guidelines.
- Performance evaluations and audit reports.
- Scalability options for future expansion.
